

Invitation to Haribon Reforestation Training

Dear Members,

Learn how to start your own **Rainforestation** project! Find out how you can **help bring back biodiversity by planting native trees** in degraded natural forests and idle lands.

This two-day training sets out to help you to appreciate the ecological properties of our natural forests, and provide you with a working knowledge of Rainforestation technology. This covers nursery establishment – including bed preparation, seed propagation, wildings collection, and preparation of growth chamber - to actual tree planting; care and maintenance; and monitoring of the rainforestation project.

This Rainforestation Training will be held on **August 23-24** at **Haribon Foundation's Buhay Punlaan, Buhay Punlaan, in Cavinti, Laguna**. The cost is P4,000 per person and includes food, transportation, accommodation and information materials.

Reserve your slots now by contacting Edel or Arlie through email: training@haribon.org.ph, landline: (02) 9116088 or mobile: (0922) 8151939.

This Training is open to private landowners, NGO's, PO's, and Reforestation practitioners.

Thank you and have a great day!
